Table of contents I

- 1 Overview
- 2 Power Curve fitting
- 3 Spatial modelling
- 4 Spatial modelling for probabilistic scenarios
- 5 Appendix

Overview

Progress check

New

- PC fitting
- Spatial modelling
- Model estimates

Next Steps

- OOS validation
- Add case study to overleaf
- Address other comments

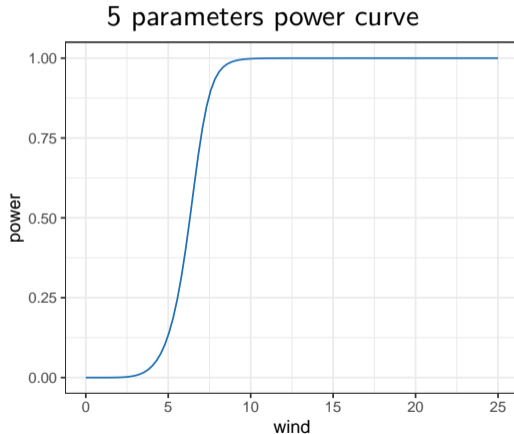

Power Curve fitting

Classic parametric shape

The five-parameter formula (Lydia et.al, 2013):

$$P(u) = D + \frac{A - D}{(1 + (u/C)^B)^G}$$

where: A and D are the upper and lower asymptotes, C controls the inflection point, B is related to the slope at inflection point, and G controls the asymmetry.

Parametric shape for cut-off

Adding extra parameters we can model the decay after cut-off:

$$P(u) = D + \frac{A - D}{(1 + (u/C_1)^{B_1})^G (1 + (u/C_2)^{B_2})^G}$$

where: A and D are the upper and lower asymptotes, C_1 is the first inflection point, C_2 is related to the cut-off, B_1 is related to the slope at inflection point, B_2 to the slope during cut-off, and G controls the asymmetry.

7 parameters power curve

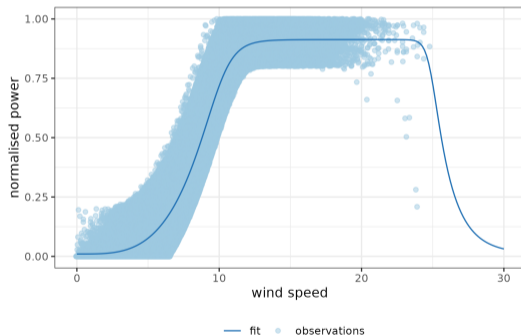

Parametric fit for Scottish wind farms

- We can fit the parametric shape using optim
- As long as there is a reasonable amount of points showing the cut-off optim can converge

Estimates from data

par	estimate
A	0.91
B1	-14.90
C1	10.38
D	0.01
G	0.24
C2	24.85
B2	82.98

Data and power curve estimate

Spatial modelling

Parametric fit for Scottish wind farms

- We can fit the parametric shape using optim
- As long as there is a reasonable amount of points showing the cut-off optim can converge

Estimates from data

par	estimate
A	0.91
B1	-14.90
C1	10.38
D	0.01
G	0.24
C2	24.85
B2	82.98

Data and power curve estimate

Spatial modelling for probabilistic scenarios

Model shapes

New models are modifications of the Normalised Error with Normal distribution (NEN)

- Model list
 - Power Ramp (PR-NEN)
 - AR1 (PR-AR1-NEN)
 - Matern-AR1 (ST-NEN)
- Pending
 - ST-PR-NEN
 - ST-RS-PR-NEN

Data

- For US data:
 - Length: 18 months
 - Resolution: hourly
 - Locations: 1 region aggregated
- UK data:
 - Length: 1 to 3 months
 - Resolution: hourly
 - Locations 10 Scottish wind farms

Trying to keep fit time < 10min

10 Scottish wind farms
